

Giddy Folks

YES, we can start with goood news today... but just a quickie as I'm runn'n outta steam...

Chart Updates

Stocks are now cook'n with gas....

With a bit of luck, Commodities will be rock'n tomorrow too!

My Watchlist

You can add or delete your own stocks in the watchlist by right clicking it. Have a play, it's pretty simple!

Stocks User Manual

It's getting closer, in the meantime, you have plenty of study to do in the Futures Made EASY Manual. The entry and exit signals are the same for Stocks as they are for Commodities.

Time Difference

Please consider the time difference between Australia and the US. If you are in the US and you email us during your morning, we should be tucked in bed asleep. We'll reply to your email as soon as our day starts. It's not that we're being slack with taking all day to reply!?!?

SPAM Filters

Ahhhh, who invented those damn things???? If you're missing replies to your emails, take a look in your spam folder. When I sent out our bulk email letting ya'll know about our launch, it blacklisted my email address with some ISPs and put me in some of your Spam folders. That could be a good place to start if you're missing any replies to emails.

Well that's it for me today, have a play with your watchlist and include us in your prayers so we can have more good news for you tomorrow.

Good night, morning, whatever it is where you are.

Kind regards as always and let the profits flow...
The Aussies

P.S. There's been some pretty good High Yield Covered Call and Naked Put candidates this week, ya been taking a look at them?
