

Giddy Folks

Well we're getting closer.... Stocks updated perfectly, a little hitch with Commodities, which we have now overcome so.... We're getting closer to having all these little bugs out of the system!

Geoff, a new Aussie client sent me the following:

I went to the gas station two weeks ago and I was the only person grinning. Everyone else was complaining about the price of fuel. A lady asked me "Why are you smiling? You just spent \$105 on a tank of petrol !!!". I told her that I had earned enough money trading unleaded gas the night before to drive my car FREE till I was too old to drive.....and I'm only 29!!!

"Fair Dinkum !!! What's your secret?" she cried. Aussie Rob's Lifestyle Trader of course.

Geoff, Australia

No doubt Geoff was all over Crude Oil again Thursday as Aussie Rob's Lifestyle Trader triggered an entry signal on Wednesday. As per the rules, enter on Thursday's open.

Open: \$66.34

Close: \$66.79

Profit: \$00.45 x \$1000 = a cool \$450 per contract

No wonder so many people are sending testimonials as really, how much easier can trading get?

Have you seen the Nikkei lately????

Moo Cows are still heading north along with the Piggies and Gold is still powering up, so too is Mr Juicy. On the flip side the Pound is taking a pounding along with the Euro.

All you budding FOREX traders out there, take a look at the currencies in the Commodities module while you're patiently waiting for me to release the FOREX module. You'll be amazed at what the charts look like! \$\$\$

Over and out.... and have a great day/night whatever it is wherever you are!

Kind Regards
The Aussies
